PROJECTS & WORK EXPERIENCE

PROPERTY PULSE | NEXT.JS   2024
Full-stack web application for property searching and hosting. The project used MongoDB as the database, allowing users to log in via Google, upload properties, view listings from other users, and send messages.

DEVJOBS | Jobs board application | TypeScript   2024
The application retrieves job data from a local JSON file, enabling users to filter jobs by title, location, and full-time positions. Users can also view detailed job descriptions and navigate to the company's website for more information.

QUIZZICAL | Quiz game | React   2023
Fun quiz game built from scratch using React, CSS and API.

TINDOG | Dating app for dogs | React   2023
The main feature was to pop up a like/nope badge on the dog's image after clicking on the like or dislike buttons. I expanded it with a message box feature, and the users can also save the liked dogs in their profile.

VISIT MY PORTFOLIO

SALES SUPPORT | Haworth   2015 APR-2023 JAN
